MAY EFFECT REDUCTION IN THE COST OF SHOES.

Maximum Price Has Been Fixed for Packed and Country Hides.

Washington, May 1.—The price fixing committee of the war industries board today fixed the maximum price of the present stocks of packed and country hides at that prevailing April 24 this year. By thus stabilizing the raw material market, officials think a reduction in the cost of shoes will be effected.

The complete schedule of hide and skin prices fixed by the committee today contains some fifteen hundred different prices. They are for the kill of May, June and July. While somewhat higher than their differential value of present stock and present market prices, the prices are declared by the committee to be reasonable. Full control by the government over all imported hides and skins, through the import license system, caused the committee to fix the prices for imported hides the same as for the domestic hides.

Tanners will be called by the price fixing committee at once, with a view of establishing fair and equitable prices on leather.
